

Activity 1. Weave the Web

The organisms pictured below represent common species found in many Georgia ecosystems. Use the descriptions to connect organisms to each other in a food web. Be sure you include all trophic levels. How many combinations can you come up with? Can you connect all of the organisms?

Sun

Black-eyed Susan

Raccoon
Berries
Eggs
Insects
Spiders
Fish

Carolina Chickadee
Insects
Spiders
Seeds

Black Rat Snake
Mammals
Reptiles
Songbirds

Coral Honeysuckle

Oak Tree

Eastern Bluebird
Caterpillars
